TEXTS: Labarre, Intermediate Mathematical Analysis

The course will hopefully cover the entire text though some of the material from the book will be rearranged.

There will be weekly homework assignments given out on Friday and due the following Friday. There will be around ten problems per assignment.

There will be a midterm around mid March, which will cover the first half of the course. The final will cover the second half of the course. One or both of these exams may be take home exams.

The homework assignments are worth 30% and the exams are worth 35%. The grading scale goes 90–100 A, 80–89 B, 70–79 C, 60–69 D and 0–59 F.

I quote the university policy on incompletes. "An INC is assigned when, for reasons beyond their control, students engaged in passing work are unable to complete all class assignments."

Note: The last day to withdraw from the course without a grade is Sunday, 3 April. If you are planning to drop the class, be sure you go through registration.
