EXPANDING YOUR HORIZONS WORKSHOP CHOICES
OCTOBER 21, 2017

AVIATION

AVIATION CAREERS. Learn about careers in the aviation industry including pilot, weather observer, and aviation maintenance technician. See the university flight training aircraft and get some hands-on experience in a Frasca flight training device.
Lorelei Ruiz, Aviation Management and Flight, SIUC

AGRICULTURAL SCIENCES

AGRICULTURAL WORKSHOPS COMING. More information coming at http://math.siu.edu/eyh/

BIOLOGICAL SCIENCES

DNA ANALYSIS. What is DNA? What information does it encode? How is DNA used in understanding disease and solving crimes? Learn the answers to these questions. In the workshop we will also extract DNA from cells and analyze it.
Judy Davie, School of Medicine, SIUC

DENTAL HYGIENE..MORE THAN JUST TEETH. A career in dental hygiene offers more than working in a dental office. The profession is continuing to expand into research, public health, education, management, and much more. In this workshop, you will be introduced to some daily functions of dental hygienists along with “hands on” experience.
Jennifer Sherry, School of Allied Health, SIUC

MICROBES: THE GOOD, THE BAD AND THE UGLY. Microorganisms, including bacteria; are essential to life on earth. Bacteria are composed of a single cell, yet they are very complex. In our bodies, bacteria outnumber our own cells and help us by making vitamins, and by protecting us from other “bad” disease-causing microbes. Many bacteria can cause diseases in humans and animals; therefore, getting to know the bacteria is important for not only appreciating the good things they do for us, but also for developing therapies against bacteria that cause disease. In the Microbiology workshop, we will learn how to “feed” and grow bacteria. We will also microscopically examine bacteria that are genetically engineered to “glow in the dark”.
Vjolca Konjufca, Microbiology, SIUC

CHEMISTRY

THE CHEMISTRY OF FIREWORKS! THE SCIENCE OF EMISSION AND ABSORPTION SPECTROSCOPY. In this workshop, students will be able to use diffraction lenses and spectroscopes to examine the unique absorption and emission properties of many metal salts used in fireworks. The various wavelengths of color emitted can be seen with the human eye, while all of the colors we do not see are trapped inside the compound!
Chelsea Bridgmoohan, Chemistry Club, Department of Chemistry, SIUC

SIMPLE, HIGH-TECH DEVICES THROUGH LOW COST. We will demonstrate synthesis of devices using simple, readily available, and low-cost materials. We will also have colorful chemistry demonstrations that utilize common ingredients available in the kitchen. These experiments will provide knowledge on many natural phenomena occurring in nature around you.
Punit Kohli, Department of Chemistry, SIUC

COMPUTER SCIENCE

TITLE COMING. Description coming
Banafsheh Rekabdar, Department of Computer Science, SIUC
EXPANDING YOUR HORIZONS WORKSHOP CHOICES

OCTOBER 21, 2017

ECONOMICS

- **DATA SCIENCE.** Science uses data, and using data to make conclusions, predictions, and decisions is a science in itself. In this workshop young scientists will use R software in the SIUC Economics computer lab to view and analyze data on the toy industry, then make predictions about the industry's future.
  
  *Scott Gilbert, Department of Economics, SIUC*

ENGINEERING AND TECHNOLOGY

- **LASERS AND PHOTONICS.** Lasers, polarization of light, and fiber optic cables will be explained and shown in the laboratory. Participants will also view a small laser show.
  
  *Mohammad R. Sayeh, Department of Electrical and Computer Engineering, SIUC*

- **Android Programming with App Inventor.** Students will be introduced to concepts for developing applications that run on the Android platform. Students will gain hands-on experience creating mobile applications with App Inventor, an open source visual development tool.
  
  *Belle Woodard, SIUC & Kylee Williams, JALC*

GEOLOGY

- **MARS EXPLORATION: IS THERE LIFE ON MARS?** During the next two decades, NASA will conduct several missions to address whether life ever arose on Mars. It's possible that life on another planet might be very different. The challenge is to be able to differentiate life from non-life no matter where one finds it, no matter what its varying chemistry, structure, and other characteristics might be. In this workshop we will learn about the ingredients necessary for life, if they have been found on Mars, and what type of life one may find on Mars in the future.
  
  *Liliana Lefticariu, Department of Geology, SIUC*

MATHEMATICS

- **MATH IS FUN!** Description coming.
  
  *Vina Castelli, Department of Mathematics, SIUC*

MEDICINE

- **A GOOD HORSE IS NEVER A BAD COLOR.** We know horses can be colors like gray, brown, white and black. And many of us know horses can be spotted, golden or red. But can you get blue, rose, champagne, spotted and striped horses? And what color is a Knabstrupper? A Grulla? A Rabicano? We'll talk about the different colors of horses and some of the genetics behind the unusual colors.
  
  *Sandy Shea, Family and Community Medicine, SIUC*

PHYSICS

- **PHYSICS WORKSHOPS COMING.** More information coming at http://math.siu.edu/eyh/

PHYSICAL FITNESS

- **YOGA FOR SELF LOVE.** Why is being a woman so powerful? Learn how to shine in your own power you possess. Learn how to create and channel your feminine energy into your career, school, art, etc.
  
  *Kennedy Rawlings, Recreational Sports and Services, SIUC*

PLANT BIOLOGY

- **PLANT BIOLOGY WORKSHOPS COMING.** More information coming at http://math.siu.edu/eyh/

PSYCHOLOGY

- **KIDS ARE CUTE! BUT HOW DO WE MEASURE THEIR BEHAVIORS?** How do our genes affect our behaviors? What is the difference between MZ and DZ twins? How do we decipher children’s behaviors? Discover more about different types of twins, and learn how to code infants’ and preschoolers’ behaviors during testing and interactions.
EXPANDING YOUR HORIZONS WORKSHOP CHOICES
OCTOBER 21, 2017

Lisabeth DiLalla, Ph.D., Emma Diaz, Matt Jamnick
Departments of Family & Community Medicine and Psychology, SIUC.

- THE SCIENCE OF PREJUDICE. Description coming.
  Kathleen Schmidt, Psychology, SIUC.

ZOOGEOGRAPHY

- AQUATIC ECOLOGY: A DAY IN THE LIFE OF A FISH. Water is an important resource for, not only humans, but also every other plant and animal on earth, and the lakes and rivers surrounding us here in Southern Illinois are buzzing with activity. In this workshop, we'll discover the creatures who make water their home, from microscopic organisms to insects to fish and learn about how water quality affects all of these animals. We'll use microscopes and other laboratory equipment to observe these creatures and to determine some characteristics of the water they live in.
  Elizabeth Patricia Tristano, Zoology, SIUC

More Workshops being added at http://math.siu.edu/eyh/ .
